

AYAAN Enterprises

We specialize in delivering top-quality civil work, electrical installations, and maintenance services. With expertise in EV charging station installation and maintenance.

Smart Home Automation

1 Enhanced Comfort

Control your home's lighting, temperature, and entertainment systems from anywhere with your mobile device. Create personalized settings for optimal comfort.

3 Energy Efficiency

Optimize your energy consumption with smart thermostats and lighting systems that automatically adjust based on your schedule and preferences.

2 Increased Security

Enjoy peace of mind with a smart security system that provides real-time alerts and remote access to your home's security cameras.

4 Convenience

Automate routine tasks, like locking your doors, turning off lights, and watering your lawn, with a simple touch on your phone.

Smart Lighting System

Dimming & Mood Control

Create the perfect ambiance for any occasion with adjustable lighting levels and color settings. Set schedules for automatic lighting adjustments, like turning on lights at dusk.

Smart Bulb Integration

Connect with popular smart bulb brands like Philips Hue and LIFX, providing a wide range of customization and control options.

Energy Savings

Reduce your energy consumption by automatically turning off lights when rooms are empty or adjusting brightness based on natural light levels.

Smart Security System

1

Remote Access & Monitoring

View live footage from your security cameras and receive instant alerts on your mobile device if any suspicious activity is detected.

2

Smart Door Locks

Control access to your home remotely, granting entry to guests or service providers even if you're not home. Receive notifications for door lock activity.

3

Motion Sensors & Alarms

Detect movement within your home and trigger alerts or activate security measures if an intrusion is detected.

Smart Water Automation

System	Features
Automatic Water Pump Controller	Controls water pump based on tank levels, provides mobile app control
Automatic Popup Sprinkler System	Automated scheduling for lawn watering, mobile app control, ensures optimal hydration for your landscape
Automatic Drip Irrigation	Precise water delivery to individual plants, promotes water conservation, mobile app controlled for optimal plant growth

E-Vehicle Charger Solutions

Residential Charging Solutions

We provide expert installation and maintenance of home charging stations compatible with various electric vehicle models.

Commercial Charging Infrastructure

Install and manage electric vehicle charging stations for businesses, apartment complexes, and public spaces.

Sustainable Solutions

We partner with leading manufacturers to provide high-quality, energy-efficient chargers for a greener future.

Solar Power Solutions

Residential Solar Panels

Reduce your electricity bills and reliance on fossil fuels with custom solar panel installation for homes. We offer comprehensive design, installation, and maintenance services.

Battery Storage Systems

Store solar energy generated during the day for use during peak hours or power outages, ensuring a reliable and sustainable energy supply.

Off-Grid Solar Systems

Live independently from the grid with a complete off-grid solar system that provides power for your entire home, including lighting, appliances, and electronics.

Our clients

Bright Blue

Bright Blue combines AI, IoT, and advanced technology to revolutionize the EV charging landscape.

VNT System Infra

VNT specializes in providing cutting-edge solutions for power management, telecom, solar energy, and fire safety systems.

Star Charge

Star Charge is a global leader in EV charging solutions, providing a range of AC and DC fast charging options.

Terra Motors

Terra Charge is a subsidiary of Terra Motors, a Japanese company specializing in electric vehicle (EV) infrastructure.

We also provide our specialization and expertise to System Infra Pvt. Ltd and more other bussiness.
